

Soumyodipta Majumdar

Software Engineer | Data & BI Analyst

<https://soumyodiptam.github.io> | India (Open to relocation) | 19soumyo@gmail.com | LinkedIn

Technical Skills

Programming: Python, SQL, JavaScript, TypeScript, Java

Frontend Development: HTML5, CSS3

Backend Development: Node.js, Django, RESTful APIs

Data Analytics & BI: Power BI, Pandas, NumPy, Excel, Statistical Modelling, Data Visualisation

Developer Tools & Platforms: Git, Jenkins (CI/CD), MongoDB, Postman, Jupyter, QGIS

Engineering & Analytics Practices: Agile Development, Data Analysis, Reporting

Relevant Experience

Independent STEM Mentor

Remote | December 2024 – Present

- Raised GCSE student performance by 20–30% by analysing assessment trends and tailoring lesson strategies using Excel-based performance data.
- Boosted student engagement and confidence by delivering personalised support through progress tracking and feedback-driven learning approaches.
- Simplified complex mathematical and technical concepts by adapting problem-solving techniques into accessible and structured learning methods.

Graduate Data Analyst | Serco

Liverpool, United Kingdom | February 2024 – September 2024

- Generated actionable business insights by transforming and analysing datasets using Python and SQL to support operational decision-making.
- Enhanced reporting visibility for cross-functional stakeholders by building and maintaining interactive Power BI dashboards and visualisations.
- Strengthened project scalability and reporting consistency by maintaining SharePoint workflows, business requirements, and BI documentation processes.
- Improved data reliability across reporting pipelines by conducting structured data validation, cleaning, and analytical quality checks.

Data and Technology Graduate | Greggs PLC

Liverpool, United Kingdom | February 2022 – January 2024

- Optimised operational reporting accuracy by extracting, cleaning, and analysing business datasets using SQL and Python.
- Supported management decision-making by collaborating with cross-functional teams to identify trends and deliver actionable operational insights.
- Expanded sales performance visibility by developing Power BI dashboards with KPI tracking and trend analysis, contributing to a 71% improvement in sales outcomes.

Full Stack Engineer | Capgemini

Pune, India | June 2018 – September 2020

- Cut customer issue resolution time by 35% by developing and optimising scalable RESTful APIs and backend services using Node.js.
- Streamlined reporting workflows by automating daily customer data processes through Python-based automation scripts.
- Improved software delivery reliability by collaborating within Agile engineering teams using Git version control and CI/CD practices.
- Contributed to scalable web application development by supporting backend integration, API development, and TypeScript-based engineering workflows.

Education

M.Sc. Advanced Computer Science | University of Liverpool

Liverpool, UK | 2020 – 2022

B.Tech. Information Technology | WBUT

India | 2014 – 2018
